Dear Hiring Manager,

I am writing to express my interest in the System Administrator role with a focus on support, as advertised on your website. I believe that my experience, skills and passion for automation and control processing make me an excellent fit for this position.

I am a Systems Engineer with a strong background in control and automation, having graduated from Los Andes University in Venezuela. I have experience working with a range of tools and technologies, including WordPress, Woocommerce, HTML, CSS, MATLAB, Simulink, Proteus, MS Office, Google Suite, LaTeX, Linux (Ubuntu), Python, JavaScript, Git, Selenium, and MySQL.

In addition to my technical skills, I am also a fluent English speaker with the ability to work effectively in a team or independently, as required. I have a demonstrated track record of taking initiative to solve problems and working well under pressure, which I believe will be particularly valuable in this role.

I am particularly excited about the opportunity to work with cutting-edge AI research and interesting technology, including single-board-computers, microcontrollers, HPC-clusters, and 3D printers. I believe that my skills and experience make me well-suited to support your workstation and lab systems, participate in IT projects, administer user accounts, provide 1st level support for scientists and non-scientific employees, and support videoconferencing systems.

Thank you for considering my application. I look forward to the opportunity to discuss my qualifications further.

Sincerely,

Maria Daniela Baptista Theuerkauf
